EDUCATION

The College of Idaho

B.S. Computer Science | B.A. Finance — Dean's List (consecutive years)

Caldwell, ID
Expected May 2027

Relevant coursework: Statistical Machine Learning, Senior Software Engineering & AI, Data Structures and Algorithms, Linear Algebra, Intermediate Accounting, Financial Problems.

EXPERIENCE

Data Engineer Intern — Oppenheimer Companies, Inc. (OCI)

Boise, ID | Summer 2026

- Built and maintained ETL/ELT pipelines supporting enterprise data workflows and downstream reporting.
- Cleaned, transformed, and validated datasets in Python and SQL, resolving quality issues at the source before they reached analysts and reports.
- Monitored pipeline health, diagnosed failures, and documented data processes and workflows so the team could trace issues quickly.
- Worked alongside data engineers and analysts through code reviews and weekly technical sessions.

Software Developer Intern — The College of Idaho, IT Department

Caldwell, ID | Summer 2026 – Present

- Maintain and update the college's official website in WordPress, keeping content accurate and current across dozens of departmental pages.
- Implement front-end design improvements and technical fixes in coordination with IT staff and departments across campus.
- Manage site structure, plugins, and user permissions, including access control for non-technical content editors.

TECHNICAL PROJECTS

GradTrack AI — Graduate Application Tracker

Python, MCP, LLM Integration, Email API

- Co-built a full-stack AI web app that lets students track graduate school applications, with email integration that pulls status updates automatically.
- Implemented 10 MCP tools covering application status parsing, deadline alerts, program comparison, and document management.
- Designed a persistent memory layer so the assistant improves its recommendations from each user's history across sessions.
- Collaborated with a student team on GitHub across a semester of sprints, with regular code review.

College Recruitment Analytics — Machine Learning

R, tidyverse, ggplot2, caret, pandas

- Cleaned a real-world recruitment dataset from scratch — missing values, type mismatches, duplicate records, and inconsistent formatting across international student entries.
- Trained a classification model to predict which geographic regions produce the most enrolled students, informing where the college focuses recruitment spending.
- Delivered visualizations and a written report with regional breakdowns used directly by the admissions team.

LEADERSHIP & CAMPUS ROLES

Finance Committee Head Advisor — Associated Students of The College of Idaho

2024 – Present

- Oversee student body event budgets, tracking allocations and expenditures in Excel and reconciling actuals against approved amounts.
- Review event funding proposals with organizers, forecast costs, and ensure funds are disbursed and documented before and after each event.
- Consolidate financial data across 10+ events into summary reports presented to student body leadership each semester.

Office Manager Coordinator — The College of Idaho, Campus Safety

2024 – Present

- Manage the full hiring cycle for incoming student workers — screening applicants, scheduling interviews, and coordinating HR paperwork before each hire's first shift.

President — Asian Student Association

- Plan events, manage logistics, and lead outreach for one of the more active clubs on campus.

President, Chess Club — Chess.com College Ambassador

- Serve as official Chess.com campus ambassador; organize tournaments and onboard students to the platform.

SKILLS

Languages Python (pandas, NumPy), SQL, R (tidyverse, ggplot2, caret)

Tools & Platforms Git / GitHub, Microsoft Azure, VS Code, WordPress, Excel

Concepts ETL/ELT pipelines, data cleaning & transformation, data validation & documentation, ML model training & evaluation
